

RETROFITTING AND MODERNISATION OF MACHINE TOOLS

Retrofitting of a Vertical Turning and Boring Mill, Make SEDIN, Diameter of Faceplate: 4,000 mm

Hellwig Offers You a Full Service for Your Special Machine(s)

In close collaboration with your team, we will proof all economically reasonable ways to realize your project. This involves feasibility studies right up to purchasing an appropriate basis machine.

Due to its long-time and international contacts, Hellwig has the ability to provide you with an appropriate machine. If you wish an expertise or need a purchase advice on-site, we will accompany you to the location of the machine you want to buy. We are looking forward to help you with professional advice. Please contact us if you plan (a retrofitting of) a special machine.
