

RETROFITTING AND MODERNISATION OF MACHINE TOOLS

Vertical Turning and Boring Mill "Froriep"

Hellwig Offers You a Full Service for Your Special Machine(s)

In close collaboration with your team, we will proof all economically reasonable ways to realize your project. This involves feasibility studies right up to purchasing an appropriate basis machine.

Due to its long-time and international contacts, Hellwig has the ability to provide you with an appropriate machine. If you wish an expertise or need a purchase advice on-site, we will accompany you to the location of the machine you want to buy. We are looking forward to help you with professional advice.

Please contact us if you plan (a retrofitting of) a special machine.

- retrofitting with geometry according to DIN
- conversion of the turning station into a position-controlled single axis drive
- conversion of the main transmission into an adjustable one (V-constant)
- construction and manufacturing of a protection device for the face plate
- new electronic system with CNC control "Heidenhain Manual Plus"
